Overview

Live 1:1 mock interview with a Java expert covering Core Java, Spring Boot, databases and a frontend framework, with a detailed feedback report.

This mock interview simulates a real Full Stack Java Developer hiring process. Your expert will start with a short introduction, then move through Core Java and OOP, Spring Boot and REST APIs, SQL and JPA, frontend basics, and a project discussion. Depending on the slot length, you may also get a small coding or design problem to think through aloud.

It is useful for final-year students, freshers and career switchers preparing for Java developer roles. After the session you receive an AI-assisted PDF report with 1-5 ratings on each criterion, your strengths, areas to improve and clear next steps, so you know exactly what to practise before your actual interviews.

Questions focus on Java 8 and above with Spring Boot, JPA and REST. For the frontend, React or Angular is covered based on what is on your resume.

Q2 Will I have to write code during the interview?

Longer slots usually include a small coding or logic task. You may be asked to share your screen and explain your approach as you go.
